<b>KEY RISKS</b>	
<p><b>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</b></p> <p>The value of the product and its dividends or coupons (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment and your principal may be at risk.</p>	<p>Refer to the “Risk Factors” and “Suspension Of Dealings” sections of the Singapore Prospectus for further information on risks of the product.</p>
<b>Market and Credit Risks</b>	
<ul style="list-style-type: none"> <li>• <b>Price risk</b> – the Shares, as well as the securities acquired by the Sub-Fund, are subject - as are any securities - to price risk. The risk of a decrease in the value of Shares, as well as the potential for an increase in their value, is usually greater in the case of an equity fund than in the case of a bond fund.</li> </ul>	

<ul style="list-style-type: none"> <li>• <b>Equity risk</b> – companies issue common shares and other kinds of equity-related securities to help pay for their operations and financial necessity. Equity securities can go down in price for many reasons.</li> <li>• <b>Exchange rate risks</b> – the Shareholders are subject to this risk due to the different currencies which may be involved, that is the currency with which Shareholders have purchased Shares, the reference currency of the Sub-Fund or Class concerned and the currency of the securities in which the Sub-Fund invests.</li> <li>• <b>Counterparty risk</b> – in entering into transactions which involve counterparties, there is a risk that a counterparty will wholly or partially fail to honour its contractual obligations. In the event of a default, bankruptcy or insolvency of a counterparty, the Sub-Fund could experience delays in liquidating the position and significant losses and may only achieve limited or possibly no recovery in such circumstances.</li> <li>• <b>Liquidity risk</b> – the Company may invest in securities and instruments that can be relatively illiquid which may cause the Company to lose money or incur extra costs when selling those securities.</li> </ul>			
<b>Liquidity Risks</b>			
<ul style="list-style-type: none"> <li>• <b>The Sub-Fund is not listed and you can redeem only on Valuation Days.</b> <ul style="list-style-type: none"> <li>○ There is no secondary market for the Sub-Fund. All redemption requests should be made to the Administrative Agent through the Singapore distributor through whom the Shares were purchased.</li> <li>○ If redemption requests are received in respect of any single Valuation Day for redemptions beyond a certain limit, the Company may delay the calculation of the redemption price and payment may be made, with the approval of the Shareholders concerned, in specie.</li> </ul> </li> <li>• In addition, you may not redeem your Shares during any period where redemption is suspended.</li> </ul>			
<b>Product-Specific Risks</b>			
<ul style="list-style-type: none"> <li>• <b>Emerging market risk</b> – the Sub-Fund invests in equity and equity-related securities throughout the world that provide exposure to emerging markets which tend to be more volatile than mature markets and its value could move sharply up or down. In some circumstances, the underlying investments may become illiquid which may constrain the Investment Manager's ability to realise some or all of the portfolio. The registration and settlement arrangements in emerging markets may be less developed than in more mature markets so the operational risks of investing are higher. Political risks and adverse economic circumstances are more likely to arise.</li> <li>• <b>Currency risk</b> – Shares Classes may be available in different currencies than the reference currency of the Sub-Fund, and therefore will be converted to the reference currency of the Sub-Fund at the point of investment. This investment will then be converted back to the reference currency of the Share Class at the point at which an investor withdraws their money from the Sub-Fund. The investor will therefore receive the return of the underlying investments in the Sub-Fund, as well as the currency movement between the reference currency of the Sub-Fund and the reference currency of the Share Class.</li> <li>• <b>Sustainability risk</b> - the risk arising from any environmental, social or governance events or conditions that, were they to occur, could cause material negative impact on the value of the investment.</li> </ul>
